LEADING NEWS:

AUTOMATIZACIÓN DE PRENSAS S.L.

Has developed, for a major company, world leader in the sector of metal stamping for the automotive sector, a compact feed line for medium and high elastic limit materials.

CNC CONTROL

Thanks to its computer numerical control (CNC), and its programming unit with LCD color touch-screen, the system allows the adjustment of all working parameter in an easy and intuitive way, being able to be handled from the same control unit as the press thanks to its Ethernet communication.
